EastSide Charter School Wellness Policy

Preamble

EastSide Charter School (hereto referred to as EastSide) is committed to the optimal development of every student. EastSide believes that for students to have the opportunity to achieve personal, academic, developmental and social success, we need to create positive, safe and health-promoting learning environments at every level, in every setting, throughout the school year.

Research shows that two components, good nutrition and physical activity before, during and after the school day, are strongly correlated with positive student outcomes. For example, student participation in the U.S. Department of Agriculture's (USDA) School Breakfast Program is associated with higher grades and standardized test scores, lower absenteeism and better performance on cognitive tasks.^{1,2,3,4,5,6,7} Conversely, less-than-adequate consumption of specific foods including fruits, vegetables and dairy products, is associated with lower grades among students.^{8,9,10} In addition, students who are physically active through active transport to and from school, recess, physical activity breaks, high-quality physical education and extracurricular activities – do better academically.^{11,12,13,14} Finally, there is evidence that adequate hydration is associated with better cognitive performance.^{15,16,17}

This policy outlines EastSide's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. Specifically, this policy establishes goals and procedures to ensure that:

- Students have access to healthy foods throughout the school day – both through reimbursable school meals and other foods available throughout the school campus– in accordance with Federal and state nutrition standards; will accommodate the religious, ethnic, and cultural diversity of the student body in meal planning.
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
- Students have opportunities to be physically active during and after school;
- Schools engage in nutrition and physical activity promotion and other activities that promote student wellness;
- Eastside will engage students, parents, teachers, food service professionals, and other interested community members in establishing and maintaining an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives.

This policy applies to all student, staff and visitors at EastSide. Specific measureable goals and outcomes are identified within each section below.

I. School Wellness Committee

Committee Role and Membership

EastSide will convene a representative school wellness committee (hereto referred to as the SWC or work within an existing school health committee) that meets at least four times per year to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of this district-level wellness policy (heretofore referred as “wellness policy”).

The SWC membership will represent all school levels (elementary and secondary schools) and include (to the extent possible), but not be limited to: parents and caregivers; students; representatives of the school nutrition program, physical education teachers; health education teachers; school health professionals (e.g., health education teachers, school health services, staff nurses, health educators, and other allied health personnel who provide school health services), and mental health and social services staff [e.g., school counselors, psychologists, social workers, or psychiatrists]; school administrators (e.g., principal, vice principal), school board members; health professionals (e.g., dietitians, doctors, nurses, dentists); and the general public. When possible, membership may also include Supplemental Nutrition Assistance Program Education coordinators (SNAP-EDEDSNAP-Ed). To the extent possible, the SWC will reflect the diversity of the community.

Leadership

The Special Projects Coordinator will convene the SWC and facilitate development of and updates to the wellness policy, and will ensure each school’s compliance with the policy.

The designated official for oversight is

Haley Burnham

Special Projects Coordinator

3000 N. Claymont Street

Wilmington, DE 19802

Haley.Burnham@escs.k12.de.us

II. Wellness Policy Implementation, Monitoring, Accountability and Community Engagement

Implementation Plan

EastSide will develop and maintain a plan for implementation to manage and coordinate the execution of this wellness policy. The plan delineates roles, responsibilities, actions and timelines specific to each school; and includes information about who will be responsible to make what change, by how much, where and when; as well as specific goals and objectives for nutrition standards for all foods and beverages available on the school campus, food and beverage marketing, nutrition promotion and education, physical activity, physical education and other school-based activities that promote student

wellness. The SWC will complete a school-level assessment based on the Centers for Disease Control and Prevention's School Health Index to give baseline data to identify and prioritize needs to create an action plan that fosters implementation and generate an annual progress report.

This wellness policy and the progress reports can be found at: <http://www.eastsidecharterschool.org>.

Recordkeeping

EastSide will retain records to document compliance with the requirements of the wellness policy at EastSide Charter School, in the Main Office as well as Nurse's Office, and Business office and on School Foods Authority computer account. Documentation maintained in this location will include but will not be limited to:

- The written wellness policy;
- Documentation demonstrating that the policy has been made available to the public;
- Documentation of efforts to review and update the Local Schools Wellness Policy; including an indication of who is involved in the update and methods the district uses to make stakeholders aware of their ability to participate on the SWC;
- Documentation to demonstrate compliance with the annual public notification requirements;
- The most recent assessment on the implementation of the local school wellness policy;
- Documentation demonstrating the most recent assessment on the implementation of the Local School Wellness Policy has been made available to the public.

Annual Notification of Policy

EastSide will actively inform families and the public each year of basic information about this policy, including its content, any updates to the policy and implementation status. EastSide will make this information available via the school website. EastSide will provide as much information as possible about the school nutrition environment and will include a summary of EastSide's events or activities related to wellness policy implementation. Annually, EastSide will also publicize the names and contact information of the school officials leading and coordinating the committee, as well as information on how the public can get involved with the school wellness committee.

Triennial Progress Assessments

At least once every three years, EastSide will evaluate compliance with the wellness policy to assess the implementation of the policy and include:

- The extent to which EastSide is in compliance with the wellness policy;
- The extent to which EastSide's wellness policy compares to the Alliance for a Healthier Generation's model wellness policy; and
- A description of the progress made in attaining the goals of EastSide's wellness policy.

The position/person responsible for managing the triennial assessment and contact information is Haley Burnham, Special Projects Coordinator, and Haley.Burnham@escs.k12.de.us.

The SWC will monitor EastSide's compliance with this wellness policy.

EastSide will actively notify households/families of the availability of the triennial progress report via our school website.

Revisions and Updating the Policy

The SWC will update or modify the wellness policy based on the results of the annual School Health Index and triennial assessments and/or as school's priorities change; community needs change; wellness goals are met; new health science, information, and technology emerges; and new Federal or state guidance or standards are issued. The wellness policy will be assessed and updated as indicated at least every three years, following the triennial assessment.

Community Involvement, Outreach and Communications

EastSide is committed to being responsive to community input, which begins with awareness of the wellness policy. EastSide will actively communicate ways in which representatives of SWC and others can participate in the development, implementation and periodic review and update of the wellness policy through a variety of means appropriate for the school. EastSide will also inform parents of the improvements that have been made to school meals and compliance with school meal standards, availability of child nutrition programs and how to apply, and a description of and compliance with Smart Snacks in School nutrition standards. EastSide will use electronic mechanisms, such as email or displaying notices on the school's website, as well as non-electronic mechanisms, such as newsletters, presentations to parents, or sending information home to parents, to ensure that all families are actively notified of the content of, implementation of, and updates to the wellness policy, as well as how to get involved and support the policy. EastSide will ensure that communications are culturally and linguistically appropriate to the community, and accomplished through means similar to other ways that we are communicating important school information with parents.

EastSide will actively notify the public about the content of or any updates to the wellness policy annually on the school website and Facebook page, at a minimum. EastSide will also use these mechanisms to inform the community about the availability of the annual and triennial reports.

III. Nutrition

School Meals

Our school is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, and fat-free and low-fat milk; that are moderate in sodium, low in saturated fat, and have zero grams *trans*-fat per serving (nutrition label or manufacturer's specification); and to meeting the nutrition needs of school children within their calorie requirements. The school meal programs aim to improve the diet and health of school children, help mitigate childhood obesity, model healthy eating to support the development of lifelong healthy eating patterns and support healthy choices while accommodating cultural food preferences and special dietary needs.

EastSide participates in USDA child nutrition programs, including the National School Lunch Program (NSLP), the School Breakfast Program (SBP), the Fresh Fruit & Vegetable Program (FFVP), and the Summer Food Service Program (SFSP). The school also operates additional nutrition-related programs and activities including Breakfast in the Classroom. EastSide is committed to offering school meals through the NSLP and SBP programs, and other applicable Federal child nutrition programs, that:

- Are accessible to all students;
- Are appealing and attractive to children;
- Are served in clean and pleasant settings;
- Meet or exceed current nutrition requirements established by local, state, and Federal statutes and regulations. EastSide offers reimbursable school meals that meet USDA nutrition standards.
- Promote healthy food and beverage choices using the following [Smarter Lunchroom techniques](#):
 - Whole fruit options are displayed in attractive bowls or baskets (instead of chaffing dishes or hotel pans).
 - Daily fruit options are displayed in a location in the line of sight and reach of students.
 - All staff members, especially those serving, have been trained to politely prompt students to select and consume the daily vegetable options with their meal.
 - White milk is placed in front of other beverages in all coolers.
 - Alternative entrée options (e.g., salads, sandwiches, etc.) are highlighted on posters or signs within all service and dining areas.
 - Student surveys and taste testing opportunities are used to inform menu development.
 - Daily announcements are used to promote and menu options.
- Menus will be posted on EastSide’s website, and will include nutrient content and ingredients.
- The school child nutrition program will accommodate students with special dietary needs.
- Students will be allowed at least 10 minutes to eat breakfast and at least 20 minutes to eat lunch, counting from the time they have received their meal and are seated.
- EastSide will, to the extent possible, arrange bus schedules and utilize methods to serve school breakfasts that encourage participation, including serving breakfast in the classroom and allowing students to receive breakfast until 9:30 am.
- Students are served lunch at a reasonable and appropriate time of day.
- Lunch will, to the extent possible, follow the recess period to better support learning and healthy eating.
- Students will not be scheduled for tutoring, clubs, or organizational meetings or activities during mealtimes, unless students may eat during such activities.
- Students will have access to hand washing or hand sanitizing before they eat meals or snacks.
- EastSide will take reasonable steps to accommodate the tooth-brushing regimens of students with special oral health needs (e.g. orthodontia or high tooth decay risk).
- Participation in Federal child nutrition programs will be promoted among students and families to help ensure that families know what programs are available in their children’s school.
- EastSide does not allow students & adults to share their foods or beverages with one another during meal or snack times, given concerns about allergies and other restrictions on some children’s diets.
- Snacks served during the school day will meet USDA Smart Snacks in Schools nutrition standard and will make a positive contribution to children’s diets and health, with an emphasis on serving fruits and vegetables as the primary snacks and water as the primary beverage. EastSide will assess if and when to offer snacks based on timing of school meals, children’s nutritional needs, children’s ages, and other considerations per the Director of Nutrition only.

Staff Qualifications and Professional Development

All school nutrition managers and staff will meet or exceed hiring and annual continuing education/training requirements in the USDA professional standards for child nutrition professionals. These school nutrition personnel will refer to USDA’s Professional Standards for School Nutrition Standards website to search for training that meets their learning needs. EastSide will provide educational development to all staff members with regards to food allergies and anaphylaxis.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day. EastSide will make drinking water available where school meals are served during mealtimes.

- Water cups/jugs will be available in the cafeteria if a drinking fountain is not present.
- All water sources and containers will be maintained on a regular basis to ensure good hygiene and health safety standards. Such sources and containers may include drinking fountains, water jugs or hydration stations.
- Students will be allowed to bring and carry (approved) water bottles filled with only water with them throughout the day.

Competitive Foods and Beverages

EastSide is committed to ensuring that all foods and beverages available to students on the school campus during the school day support healthy eating. The foods and beverages sold and served outside of the school meal programs (e.g., “competitive” foods and beverages) will meet the USDA Smart Snacks in School nutrition standards, at a minimum. Smart Snacks aim to improve student health and well-being, increase consumption of healthful foods during the school day and create an environment that reinforces the development of healthy eating habits. A summary of the standards and information, as well as a Guide to Smart Snacks in Schools are available at: <http://www.fns.usda.gov/healthierschoolday/tools-schools-smart-snacks>. The Alliance for a Healthier Generation provides a set of tools to assist with implementation of Smart Snacks available at www.foodplanner.healthiergeneration.org.

To support healthy food choices and improve student health and well-being, all foods and beverages outside the reimbursable school meal programs that are sold to students on the school campus during the school day will meet or exceed the USDA Smart Snacks nutrition standards. These standards will apply in all locations and through all services where foods and beverages are sold, which may include, but are not limited to, à la carte options in the cafeterias, vending machines, or the school store.

Celebrations and Rewards

All foods offered on the school campus will meet or exceed the USDA Smart Snacks in School nutrition standards including through:

1. Celebrations and parties. EastSide will provide a list of non-food related party ideas to parents and teachers for all celebrations and parties held in school.
2. Rewards and incentives. The school will provide teachers and other relevant school staff a list of alternative ways to reward children.
3. Eastside will compile and continually update a list of foods that meet Smart Snack Standards and distribute it to teachers and staff.

Fundraising

Foods and beverages that meet or exceed the USDA Smart Snacks in Schools nutrition standards may be sold through fundraisers on the school campus during the school day.

- EastSide will make every effort, to the extent possible, healthy fundraising choices. If a fundraiser does not meet or exceed the USDA Smart Snacks in School nutrition standard then it will be sold off campus and will not be marketed in the school.

- Foods sold during non-school hours and outside the normal school day will strive to provide healthy choices when possible.

Nutrition Promotion

Nutrition promotion and education positively influence lifelong eating behaviors by using evidence-based techniques and nutrition messages, and by creating food environments that encourage healthy nutrition choices and encourage participation in school meal programs. Students and staff will receive consistent nutrition messages throughout schools, classrooms, gymnasiums, and cafeterias. Nutrition promotion also includes marketing and advertising nutritious foods and beverages to students and is most effective when implemented consistently through a comprehensive and multi-channel approach by school staff, teachers, parents, students and the community.

EastSide will promote healthy food and beverage choices for all students throughout the school campus, as well as encourage participation in school meal programs. This promotion will occur through at least:

- Implementing evidence-based healthy food promotion techniques through the school meal programs using [Smarter Lunchroom techniques](#); and
- Ensuring 100% of foods and beverages promoted to students meet the USDA Smart Snacks in School nutrition standards. Additional promotion techniques are available at <http://www.foodplanner.healthiergeneration.org/>.

Nutrition Education

EastSide will teach, model, encourage and support healthy eating by all students. We will provide nutrition education and engage in nutrition promotion that:

- Is offered at each grade level as part of a sequential, comprehensive, standards-based program that is designed to provide students with the knowledge and skills necessary to promote and protect their health;
- Is part of not only health education classes, but also integrated into other classroom instruction through subjects such as math, science, language arts, social sciences and elective subjects;
- Includes enjoyable, developmentally-appropriate, culturally-relevant and participatory activities, such as cooking demonstrations or lessons, promotions, taste-testing, farm visits and school gardens;
- Promotes fruits, vegetables, whole-grain products, low-fat and fat-free dairy products and healthy food preparation methods;
- Emphasizes caloric balance between food intake and energy expenditure (promotes physical activity/exercise);
- Links with school meal programs, cafeteria nutrition promotion activities, school gardens, Farm to School programs, other school foods and nutrition-related community services;
- Teaches media literacy with an emphasis on food and beverage marketing; and
- Includes nutrition education training for teachers and other staff.

Essential Healthy Eating Topics in Health Education

EastSide will include in the health education curriculum a minimum of 12 of the following essential topics on healthy eating:

- Relationship between healthy eating and personal health and disease prevention
- Food guidance from [MyPlate](#)
- Reading and using FDA's nutrition fact labels
- Eating a variety of foods every day
- Balancing food intake and physical activity
- Eating more fruits, vegetables and whole grain products
- Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain *trans* fat
- Choosing foods and beverages with little added sugars
- Eating more calcium-rich foods
- Preparing healthy meals and snacks
- Risks of unhealthy weight control practices
- Accepting body size differences
- Food safety
- Importance of water consumption
- Importance of eating breakfast
- Making healthy choices when eating at restaurants
- Eating disorders
- [The Dietary Guidelines for Americans](#)
- Reducing sodium intake
- Social influences on healthy eating, including media, family, peers and culture
- How to find valid information or services related to nutrition and dietary behavior
- How to develop a plan and track progress toward achieving a personal goal to eat healthfully
- Resisting peer pressure related to unhealthy dietary behavior
- Influencing, supporting, or advocating for others' healthy dietary behavior

Food and Beverage Marketing in Schools

EastSide is committed to providing a school environment that ensures opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions. EastSide strives to teach students how to make informed choices about nutrition, health and physical activity. These efforts will be weakened if students are subjected to advertising on our property that contains messages inconsistent with the health information EastSide is imparting through nutrition education and health promotion efforts. It is the intent of EastSide to protect and promote student's health by permitting advertising and marketing for only those foods and beverages that are permitted to be sold on the school campus, consistent with the EastSide's wellness policy.

Any foods and beverages marketed or promoted to students on the school campus during the school day will meet or exceed the USDA Smart Snacks in School nutrition standards such that only those foods that comply with or exceed those nutrition standards are permitted to be marketed or promoted to students.

Food and beverage marketing is defined as advertising and other promotions in schools. Food and beverage marketing often includes an oral, written, or graphic statements made for the purpose of promoting the sale of a food or beverage product made by the producer, manufacturer, seller or any

other entity with a commercial interest in the product.¹⁵ This term includes, but is not limited to the following:

- Brand names, trademarks, logos or tags, except when placed on a physically present food or beverage product or its container.
- Displays, such as on vending machine exteriors
- Corporate brand, logo, name or trademark on school equipment, such as marquees, message boards, scoreboards or backboards (Note: immediate replacement of these items are not required; however, EastSide will replace or update scoreboards or other durable equipment when existing contracts are up for renewal or to the extent that is financially possible over time so that items are in compliance with the marketing policy.)
- Corporate brand, logo, name or trademark on cups used for beverage dispensing, menu boards, coolers, trash cans and other food service equipment; as well as on posters, book covers, pupil assignment books or school supplies displayed, distributed, offered or sold by the school.
- Advertisements in school publications or school mailings.
- Free product samples, taste tests or coupons of a product, or free samples displaying advertising of a product.

As EastSide/school nutrition services/Athletics Department/PTA/PTO reviews existing contracts and considers new contracts, equipment and product purchasing (and replacement) decisions should reflect the applicable marketing guidelines established by EastSide's wellness policy.

IV. Physical Activity

Children and adolescents should participate in at least 60 minutes of physical activity every day. A substantial percentage of students' physical activity can be provided through a comprehensive school physical activity program (CSPAP). A CSPAP reflects strong coordination and synergy across all of the components: quality physical education as the foundation; physical activity during and after school; staff involvement and family and community engagement and EastSide is committed to providing these opportunities. EastSide will ensure that these varied physical activity opportunities are in addition to, and not as a substitute for, physical education (addressed in "Physical Education" subsection). EastSide will be encouraged to participate in *Let's Move!* Active Schools (www.letsmoveschools.org) in order to successfully address all CSPAP areas. EastSide will also provide opportunities for short physical breaks between lessons or classes as appropriate.

Physical activity during the school day (including but not limited to recess, classroom physical activity breaks or physical education) will not be withheld as punishment for any reason. EastSide will provide teachers and other school staff with a [list of ideas](#) for alternative ways to discipline students.

To the extent practicable, EastSide will ensure that its grounds and facilities are safe and that equipment is available to students to be active. EastSide will conduct necessary inspections and repairs.

Physical Education

EastSide will provide students with physical education, using an age-appropriate, sequential physical education curriculum consistent with national and state standards for physical education. The physical education curriculum will promote the benefits of a physically active lifestyle and will help students develop skills to engage in lifelong healthy habits, as well as incorporate essential health education concepts (discussed in the “*Essential Physical Activity Topics in Health Education*” subsection). The curriculum will support the essential components of physical education.

All students will be provided equal opportunity to participate in physical education classes. EastSide will make appropriate accommodations to allow for equitable participation for all students and will adapt physical education classes and equipment as necessary. Any student not able to participate in physical education for any reason (e.g. sprained ankle, broken bone) must provide a doctor’s note with the restriction, including the length of the restriction, to the school nurse.

EastSide’s elementary students will receive physical education for at least 60 minutes per week throughout the school year.

All EastSide middle students are required to take the equivalent of one academic year of physical education.

EastSide’s physical education program will promote student physical fitness through individualized fitness and activity assessments (via the [Presidential Youth Fitness Program](#) or other appropriate assessment tool) and will use criterion-based reporting for each student.

Essential Physical Activity Topics in Health Education

Health education will be required in all grades and the school will require middle school students to take and pass at least one health education course. EastSide will include in the health education curriculum a minimum of 12 the following essential topics on physical activity:

- The physical, psychological, or social benefits of physical activity
- How physical activity can contribute to a healthy weight
- How physical activity can contribute to the academic learning process
- How an inactive lifestyle contributes to chronic disease
- Health-related fitness, that is, cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition
- Differences between physical activity, exercise and fitness
- Phases of an exercise session, that is, warm up, workout and cool down
- Overcoming barriers to physical activity
- Decreasing sedentary activities, such as TV watching
- Opportunities for physical activity in the community
- Preventing injury during physical activity
- Weather-related safety, for example, avoiding heat stroke, hypothermia and sunburn while being physically active
- How much physical activity is enough, that is, determining frequency, intensity, time and type of physical activity
- Developing an individualized physical activity and fitness plan
- Monitoring progress toward reaching goals in an individualized physical activity plan

- Dangers of using performance-enhancing drugs, such as steroids
- Social influences on physical activity, including media, family, peers and culture
- How to find valid information or services related to physical activity and fitness
- How to influence, support, or advocate for others to engage in physical activity
- How to resist peer pressure that discourages physical activity.

Recess (Elementary)

EastSide will offer at least **20 minutes of recess** on all days during the school year. This policy may be waived on early dismissal or late arrival days. If recess is offered before lunch, EastSide will have appropriate hand-washing facilities and/or hand-sanitizing mechanisms located just inside/outside the cafeteria to ensure proper hygiene prior to eating and students are required to use these mechanisms before eating. Hand-washing time, as well as time to put away coats/hats/gloves, will be built in to the recess transition period/timeframe before students enter the cafeteria.

Outdoor recess will be offered when weather is feasible for outdoor play. Students will be allowed outside for recess except when outdoor temperature is below 40 degrees, inclusive of wind chill factors, during “code orange” or “code red” days, when it is raining or there is precipitation in the area, or at the discretion of the principal based on his/her best judgment of safety conditions.

In the event that EastSide must conduct indoor recess, teachers and staff will follow the indoor recess guidelines that promote physical activity for students, to the extent practicable.

Recess will complement, not substitute, physical education class. Recess aides or teachers will encourage students to be active, and will serve as role models by being physically active alongside the students whenever feasible.

Classroom Physical Activity Breaks (Elementary and Secondary)

EastSide recognizes that students are more attentive and ready to learn if provided with periodic breaks when they can be physically active or stretch. Thus, students will be offered periodic opportunities to be active or to stretch throughout the day on all or most days during a typical school week. EastSide recommends teachers provide short (3-5-minute) physical activity breaks to students during and between classroom times at least three days per week. These physical activity breaks will complement, not substitute, for physical education class, recess, and class transition periods.

EastSide will provide resources and links to resources, tools, and technology with ideas for classroom physical activity breaks. Resources and ideas are available through [USDA](#) and the [Alliance for a Healthier Generation](#).

Active Academics

Teachers will incorporate movement and kinesthetic learning approaches into “core” subject instruction when possible (e.g., science, math, language arts, social studies and others) and do their part to limit sedentary behavior during the school day.

EastSide will support classroom teachers incorporating physical activity and employing kinesthetic learning approaches into core subjects by providing annual professional development opportunities and

resources, including information on leading activities, activity options, as well as making available background material on the connections between learning and movement.

Teachers will serve as role models by being physically active alongside the students whenever feasible.

After School Activities

EastSide offers opportunities for students to participate in physical activity after the school day through a variety of methods. EastSide will encourage students to be physically active after school by offering extracurricular sports programs. EastSide will offer a range of activities that meet the needs, interests, and abilities of all students, including boys, girls, students with disabilities, and students with special health-care needs.

Active Transport

EastSide will assess, and if necessary and to the extent possible, make needed improvements to make it safer and easier for students to walk and bike to school. When appropriate, the school will work together with local public works, public safety, and/or police departments in those efforts. EastSide will support active transport to and from school, such as walking or biking, to the extent possible. EastSide will encourage this behavior by engaging in activities below; including but not limited to:

- Designate safe or preferred routes to school
- Use crossing guards
- Use crosswalks on streets leading to schools
- Create and distribute maps of school environment (e.g., sidewalks, crosswalks, roads, and pathways)

V. Other Activities that Promote Student Wellness

EastSide will integrate wellness activities across the entire school setting, not just in the cafeteria, other food and beverage venues and physical activity facilities. EastSide will coordinate and integrate other initiatives related to physical activity, physical education, nutrition, mental health and other wellness components so all efforts are complementary, not duplicative, and work towards the same set of goals and objectives promoting student well-being, optimal development and strong educational outcomes.

EastSide will coordinate content across curricular areas that promote student health with consultation provided by of EastSide's curriculum experts.

All efforts related to obtaining federal, state or association recognition for efforts, or grants/funding opportunities for healthy school environments will be coordinated with and complementary of the wellness policy, including but not limited to ensuring the involvement of the SWC.

School events during the school day will adhere to the wellness policy guidelines. All school-sponsored wellness events will include physical activity and healthy eating opportunities when appropriate.

Community Partnerships

EastSide will work to develop relationships with community partners (e.g., hospitals, universities/colleges, local businesses, SNAP-Ed providers and coordinators, etc.) in support of this wellness policy's implementation. New community partnerships and sponsorships will be evaluated to ensure that they are consistent with the wellness policy and its goals.

Community Health Promotion and Family Engagement

EastSide will promote to parents/caregivers, families, and the general community the benefits of and approaches for healthy eating and physical activity throughout the school year. EastSide will send home nutrition information as well as update our Facebook page with tips on healthy eating and ways to stay physically active.

As described in the "Community Involvement, Outreach, and Communications" subsection, EastSide will use electronic mechanisms (e.g., email or displaying notices on the school's website), as well as non-electronic mechanisms, (e.g., Parent's Bulletin), to ensure that all families are actively notified of opportunities to participate in school-sponsored activities and receive information about health promotion efforts.

Staff Wellness and Health Promotion

EastSide will work to establish a staff wellness subcommittee that focuses on staff wellness issues, identifies and disseminates wellness resources and performs other functions that support staff wellness in coordination with leadership staff.

EastSide will implement strategies to support staff in actively promoting and modeling healthy eating, physical activity, and mental health wellbeing that are identified by the subcommittee and desired and prioritized by the staff. EastSide promotes staff member participation in health promotion programs and will support programs for staff members on healthy eating/weight management that are accessible and free or low-cost.

Professional Learning

When feasible, EastSide will offer annual professional development opportunities and resources for staff to increase knowledge and skills about promoting healthy behaviors in the classroom and school (e.g., increasing the use of kinesthetic teaching approaches or incorporating nutrition lessons into math class, teaching breathing or coping strategies). Professional development will help EastSide staff understand the connections between academics and health and the ways in which health and wellness are integrated into academic improvement efforts.

Glossary:

Extended School Day – the time during, before and after school that includes activities such as clubs, intramural sports, band and choir practice, drama rehearsals and more.

School Campus - areas that are owned or leased by the school and used at any time for school-related activities, including on the outside of the school building, school buses or other vehicles used to transport students, athletic fields and stadiums (e.g., on scoreboards, coolers, cups, and water bottles), or parking lots.

School Day – the time between midnight the night before to 30 minutes after the end of the instructional day.

Triennial – recurring every three years.
